Electricity Museum

Make Great Discoveries!

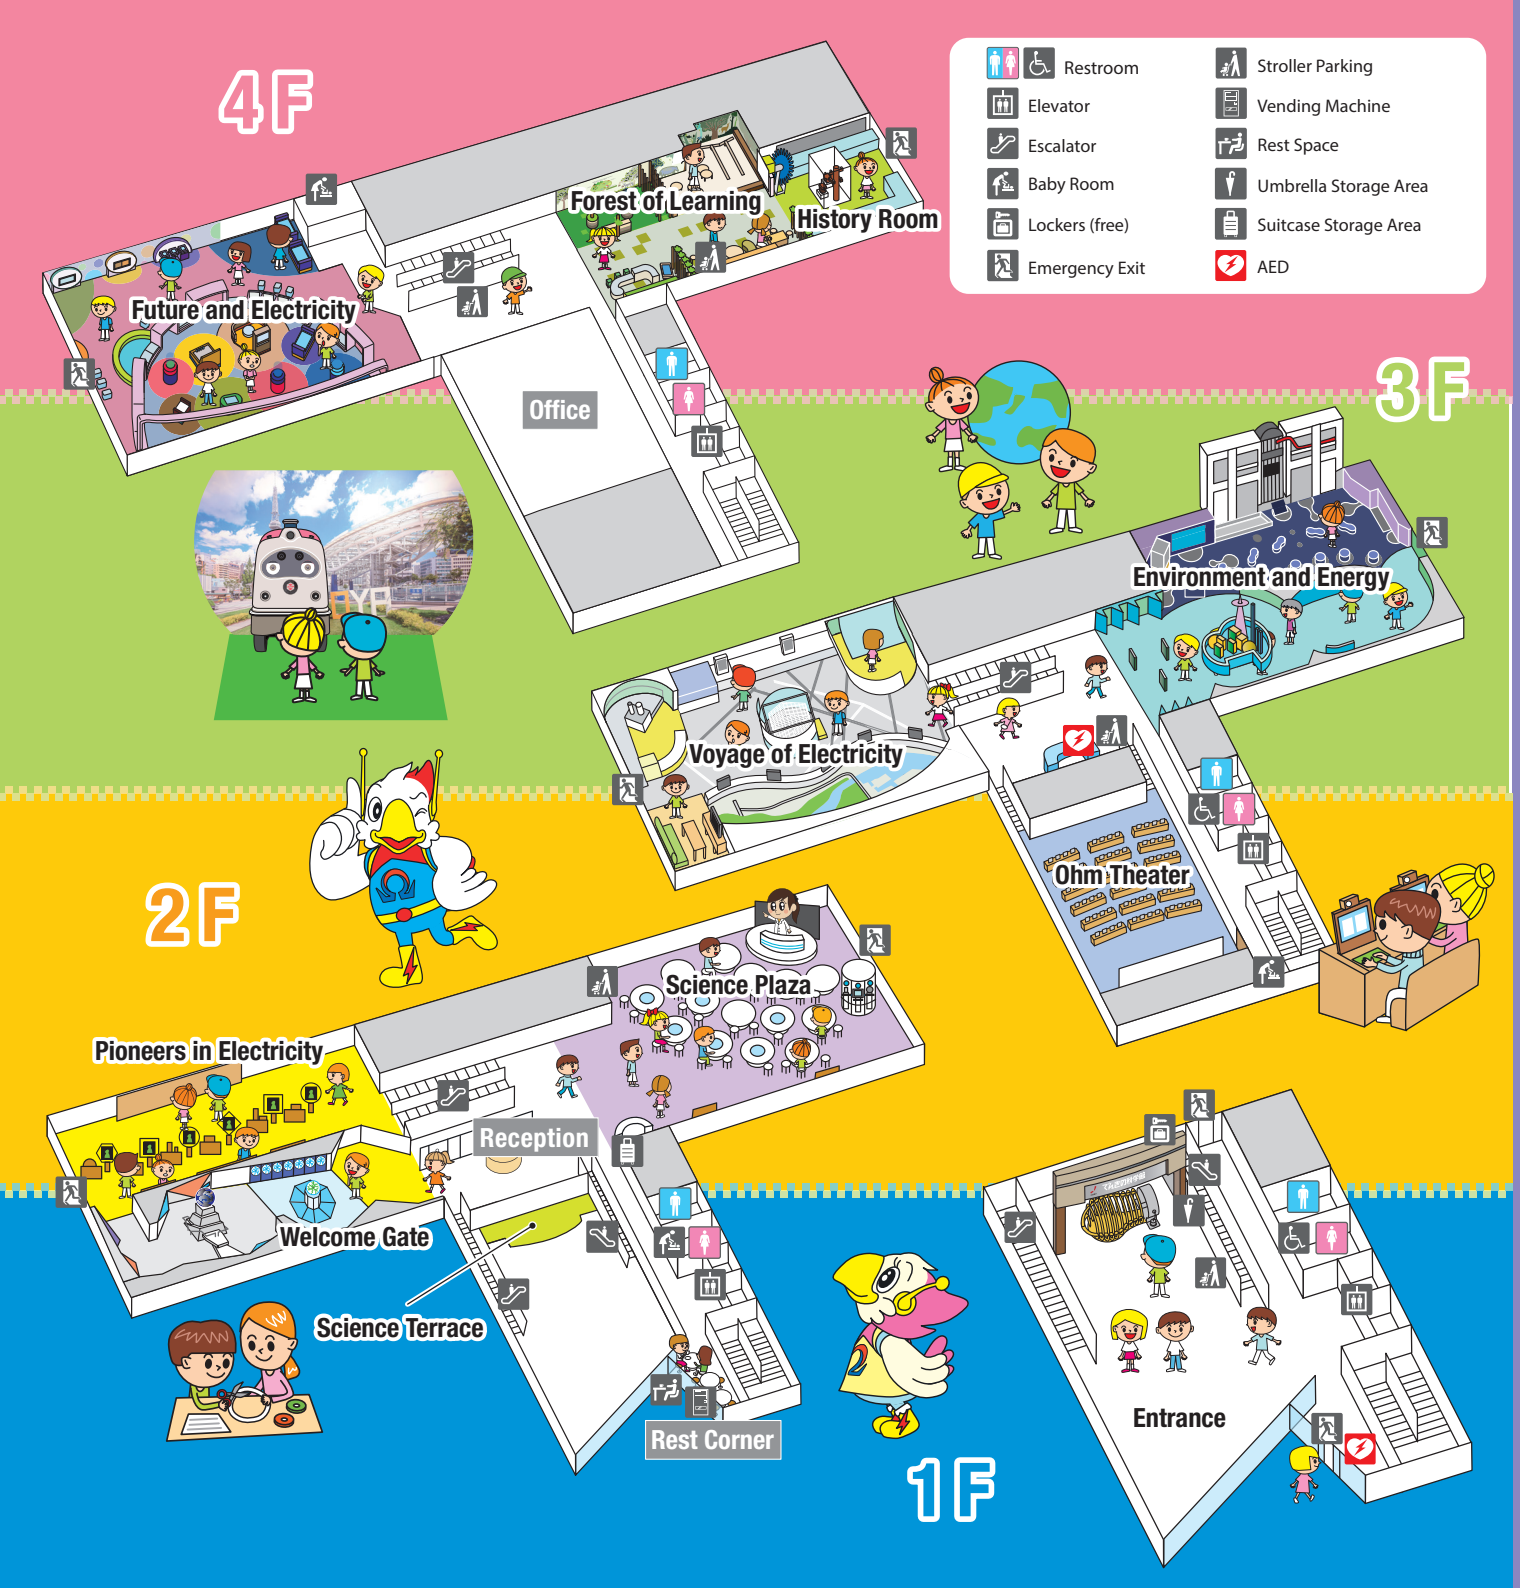

Anniversary 40th Electricity Museum

CHUBU Electric Power

History Room — 4F

Documents related to the electric power industry are on display in the History Room.

Forest of Learning — 4F

Here, you connect with nature by learning about the roles of forests and the wonders of animals. You can also learn how humans and forests support each other.

Future and Electricity — 4F

This exhibition room introduces new technologies showing how electricity is and will be generated, stored, delivered, and used in the future.

Environment and Energy — 3F

This hall is divided into three areas, the environment, energy resources and electricity generation. Here, you will learn about energy and environment related problems.

Voyage of Electricity — 3F

In this area, learn how electricity is produced at power plants and then transported for use in homes and businesses.

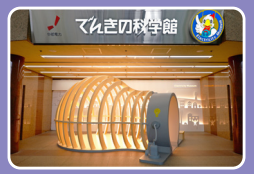

Science Plaza — 2F

Participate in fun static electricity and science experiments while learning about how amazing science is.

Pioneers in Electricity — 2F

Meet scientists like Thomas Edison and Alessandro Volta who contributed to the discovery and development of electricity.

Entrance — 1F

Welcoming everyone is a giant symbolic lightbulb which illuminates the city and society depicted on the back wall, expressing a vibrant and energetic atmosphere.
